

DEVADETH N

AI Engineer

devadethnambiyeri169@gmail.com | +91-7736696955 | Kochi, Kerala

<https://linkedin.com/in/devadeth-n> | <https://github.com/devn-cmd>

Summary

Emerging AI Engineer and Machine Learning Engineer in RAG pipelines, local LLM integration (Ollama), and full-stack development. Experienced in designing scalable AI-powered systems, including a risk-based maintenance support engine containerized via Docker. Passionate about leveraging advanced computer vision and NLP techniques to build intelligent, real-world applications.

Technical Skills

Languages: Python, JavaScript, HTML, SQL

AI/ML: Machine Learning, Deep Learning, CNN, NLP, RAG, LLM (Ollama), FAISS, Embeddings, Computer Vision, Image Classification, Predictive Modeling, Feature Engineering

Web Development: React.js, Node.js, Express.js, REST APIs

Database: MySQL, PostgreSQL

Tools & Libraries: Git, GitHub, Docker, VS Code, Power BI, Excel, UiPath, Scikit-learn, Pandas, OpenCV, MediaPipe, TensorFlow

Soft Skills: Problem-Solving, Communication, Teamwork, Analytical Thinking

Work Experience

Data Science Intern

Luminar Technolab, Kochi

Jul 2025 – Feb 2026

- Designed and trained regression and classification machine learning models using Scikit-learn and Pandas to solve core business data challenges, improving overall dataset prediction accuracy by 15% compared to initial baseline models.
- Built interactive Power BI dashboards leveraging DAX measures to consolidate cross-team operational metrics, reducing time-to-insight and boosting executive decision-making efficiency by 20%.
- Prototyped and tested convolutional neural network (CNN) based deep learning models using TensorFlow and OpenCV to evaluate performance on image-based classification tasks, documenting experimental findings for internal team reviews.

RPA Developer

RISS Technologies, Kozhikode

Jun 2024 – Aug 2024

- Built UiPath automation extracting smartphone data from Flipkart with Excel integration.
- Implemented EMI calculation module with automated Excel report generation.
- Integrated email automation with exception handling and logging for process reliability.

Education

BSc Computer Science

RSM SNDP Yogam Arts & Science College, Kozhikode

2022 – 2025

Projects

AI-Powered Maintenance Decision Support System

Mar 2026

React, Node.js, PostgreSQL, FAISS, Ollama, RAG, Docker

- Built full-stack AI system for equipment prioritization using risk-based engine (failure frequency, criticality, maintenance history).
- Integrated RAG pipeline with FAISS embeddings and local LLM (Ollama) for intelligent maintenance Q&A from documents.
- Migrated CSV to PostgreSQL; built backlog system with spare parts, crew, and tool readiness insights.
- Containerized entire system (frontend, backend, DB, AI) using Docker for consistent deployment.

Driver Drowsiness Detection

Jan 2026

Python, MediaPipe, OpenCV

- Real-time drowsiness detection using Eye Aspect Ratio (EAR) with MediaPipe FaceMesh landmarks.
- Audio alerts triggered on prolonged eye closure (EAR threshold 0.25) with counter-based detection.

Car Insurance Fraud Detection

Jan 2026

Python, Pandas, Scikit-learn

- ML pipeline processing 15K+ insurance claims (31 features) for fraud prediction.
- Implemented label encoding, temporal mapping, and VehiclePrice parsing for feature engineering.

Real Estate Price Prediction

Dec 2025

Python, Scikit-learn

- Regression model predicting property prices based on location, size, and amenities.
- Feature engineering and hyperparameter tuning for optimal model accuracy.
